EXPERIENCE

Junior Backend Developer

FreeLancer

04/2022 - Present

My Projects:

1. Traffic Management System

- Developed a comprehensive traffic management system using Flutter and Python Django with RESTful API.
- Enabled functionalities including fine payment, insurance renewal, and user-friendly access to vehicle and license information.
- Identified and resolved code bottlenecks, leading to improved software performance.

2. Intermediary Website for Buying and Selling Microservices

- Led the development process of an intermediary platform, leveraging React for the client-side and Django for the server-side architecture.
- Implemented advanced features such as real-time chat functionality using WebSocket technology and sentiment analysis functionality to analyze user interactions, enhancing the platform's understanding of user sentiment and preferences.

Sales Assistant

Technology retail store

02/2021 - 03/2023

Demonstrated expertise in customer service, sales, and technical troubleshooting to ensure customer satisfaction.

EDUCATION

INFORMATION TECHNOLOGY ENGINEERING

AL-BAATH University

10/2018 - 12/2023

Bachelor's Degree

SUMMARY

IT Engineering graduate and emerging Backend Developer skilled in Python. Demonstrated academic proficiency and hands-on experience with a focus on server-side development. Eager to leverage my educational background and passion for coding to contribute effectively in a professional setting.
